PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student with strong front-end web development skills (HTML, CSS) and hands-on experience in Internet of Things (IoT) hardware integration. Adept at leveraging Generative Artificial Intelligence (AI) tools and prompt engineering to accelerate full-stack development and complex coding tasks. Currently executing advanced academic projects, including a cloud-based RFID system and a full-stack college portal. Seeking to apply my technical foundation, AI adaptability, and problem-solving skills to innovative tech roles.

EDUCATION

DIPLOMA | CSE
GP Asthawan, Nalanda
Passing Year: Expected 2026
CGPA: 8.04 (up to 5th sem)

MATRICULATION
Sahyogi High School | Hajipur
Pass-2023
Percentage-70.6

CERTIFICATIONS

Google AI Essential | KYP | ADCA
CISCO | Ethical Hacking **|** Bootcamp
Employability Enhancement Programme
Spoken Tutorial **| LLM (IBM) | TRTC**
NIELIT

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, C, HTML, CSS.
- **Tools/Hardware:** ESP32, NodeMCU ESP8266, Arduino R3, VS Code.
- **Software:** MS Office, Canva.
- **Core Competencies:** Full-Stack Web Development, IoT Research & Development, Ethical Hacking, CPU Architecture Troubleshooting**.**

SOFT SKILLS

- **Leadership & Management**
- **Professional Communication**
- **Analytical & Work Ethic**

VOLUNTEER WORK & LEADERSHIP

- **Student T&P Cell Coordinator (CSE Branch):** Facilitated communication between the student body and prospective employers, streamlining the campus recruitment pipeline and organizing interview schedules.
- **Pool Campus Placement Organizer**: Spearheaded the logistics, corporate outreach, and communication strategies for a large-scale placement drive to maximize employment opportunities for CSE cohorts.
- **Alumni Reunion Coordinator:** Managed event planning and developed comprehensive promotional materials, including designing the official alumni brochure, to drive engagement and attendance.

TECHNICAL PROJECTS

TECH-FEST COLLEGE WEBSITE (FULL-STACK) | 01/2026 – PRESENT
- Developed a comprehensive full-stack website to manage tech-fest event information and student registrations.
- Designed a responsive frontend using HTML/CSS and leveraged AI-assisted coding tools to accelerate backend logic troubleshooting.

RFID-BASED SMART HOSTEL MANAGEMENT SYSTEM | 01/2026 – PRESENT
- Engineered an automated hardware-software solution utilizing Arduino and RFID technology.
- Integrated the local hardware setup with cloud services for real-time tracking and data logging.

PERSONAL PORTFOLIO WEBSITE | 01/2026 – 02/2026
- Designed and deployed a responsive portfolio on GitHub Pages using HTML, CSS, and JS to showcase technical progression.
- Integrated the EmailJS API to power a functional contact form, enabling real-time communication directly through the frontend.

IOT-BASED GIRL SAFETY WATCH (PROTOTYPE) | 09/2025 – 11/2025
- Led a 14-member student team to design a wearable utilizing a NodeMCU ESP8266, SOS button, and OLED display.
- Integrated the Telegram Bot API to transmit real-time emergency alerts to designated contacts upon activation.

TECH-QUIZ PLATFORM | 07/2025 – 09/2025
- Built a user-friendly frontend interface for a technical quiz platform utilizing HTML, CSS, and JavaScript.
- Created an intuitive user journey with immediate interactive feedback and dynamic DOM manipulation during quiz attempts.
- Ensured cross-browser compatibility and a clean, accessible layout to maximize user engagement.

INTERNSHIPS & INDUSTRIAL TRAINING

Employability Enhancement Programme Trainee | Centum Foundation | Infosys Foundation | Feb 2026
- Completed an intensive training program supported by Centum and Infosys Foundations aimed at improving workplace readiness and professional communication.
- Developed soft skills with a strong focus on professional behaviour and corporate communication.
- Participated in practical exercises, including mock interview sessions, and learned personal finance management basics.

IoT & Raspberry Pi Industrial Intern | NIELIT Patna | 06/2025 – 06/2025
- Architected hardware solutions during a 4-week training by interfacing Arduino and Raspberry Pi microcontrollers with various sensor modules.
- Configured GPIO pins to build high-performance automation systems and developed optimized Python scripts for automated tasks.

In plant Trainee | Tool Room & Training Centre (MSME), Patna | 10/2024 – 11/2024
- Gained hands-on industrial exposure and hardware assembly training during a 1-month in-plant program.
- Successfully reduced system diagnostic times by 20% through in-depth troubleshooting of motherboard components and CPU architecture.
- Assembled and optimized multiple computer systems while analysing internal parts for high-performance computing.
